

Super Soft Interfacing

HTL# HN109

Properties: Lightweight, soft and fine fusible non-woven interfacing made from synthetic fibres. Also available in white

Application: Lightweight, delicate interfacing to add some stability for small areas of lightweight garments such as cotton or polyester blouses and dresses.

Advantages:

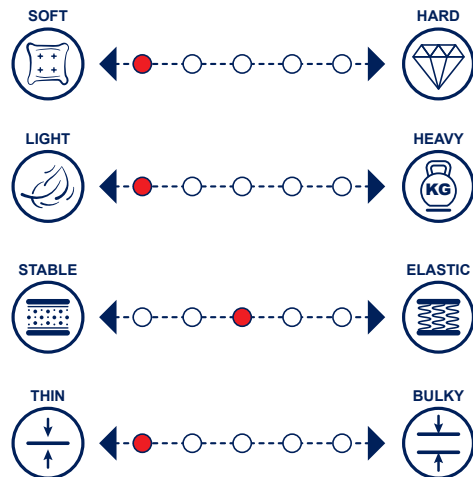

- Outstanding bond on difficult, fashion fabrics such as viscose, acetate and cupro
- Easy to iron-on
- Soft, comfortable texture
- Wash up to 40°C

Technical Data

Specification:

Width	90cm
Length	25m / roll
Packing	10 rolls / ctn
Gram	40g/m2
Material	50% Polyester, 50% Nylon
Colour	Black

Properties::

Instructions

1. Lay the interfacing with the coated side facing the reverse side of the fabric.
 2. Cover with a damp cloth and place iron down for 12-15 seconds. Lift iron and repeat until all sections are fused. (Iron setting: silk/wool).
 3. After fixing, lay the pieces flat to cool down for around 30 minutes to allow the bond to stabilise.
- N.B. Always test the product on a scrap of your project's fabric following steps 1-3 above.

Wash & Care Instructions

12-15 seconds
