

Ultra Soft Heavy Interfacing

HTL# HN116

Properties: Heavyweight, soft fusible non-woven interfacing made from synthetic fibres, with stabilising vertical threads preventing distortion of outer fabrics.

Application: Suitable for adding strength and structure to small parts of garments susceptible to distortion, in light to heavyweight fabrics such as wool and silk.

Advantages:

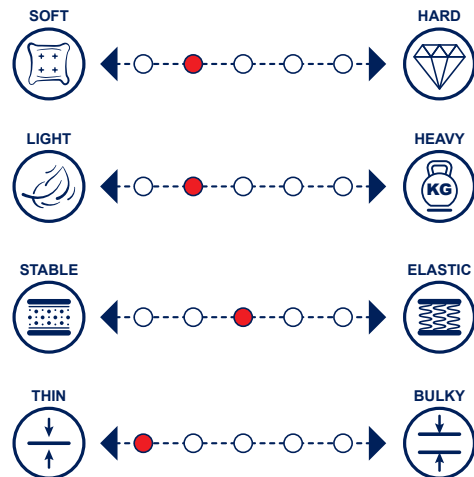

- Very high stability thanks to lengthwise thread direction
- Soft, comfortable texture
- Wash up to 40°C

Technical Data

Specification:

Width	90cm
Length	25m / roll
Packing	10rolls / ctn
Gram	45g/m2
Material	50% Polyester, 50% Nylon
Colour	White

Properties::

Instructions

1. Place pattern pieces lengthwise following the direction of the thread.
 2. Place the interfacing on the reverse side of the fabric with the coated side facing down.
 3. Cover with a damp cloth and press iron down for 10-12 sections. Raise iron, repeat section by section. Do not push the iron.
 4. After fixing, lay the pieces flat to cool down for around 30 minutes to allow the bond to stabilise.
- N.B. Always test the product on a scrap of your project's fabric following steps 2-4 above.

Wash & Care Instructions

10-12 seconds
