

Double Sided Elastic Film

HTL# HN135

Properties: Stretchable adhesive film for bonding elastic material

Application: Allows you to join two pieces of fabric together, make hems and borders on all stretch fabrics. Preserves the elasticity of the fabric.

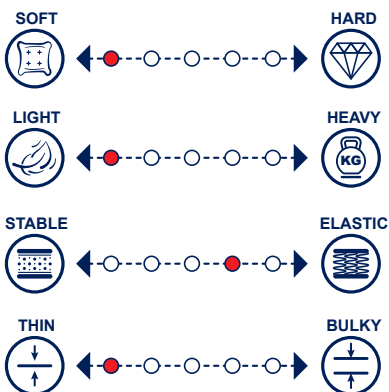

Advantages: • Stretchable • Activated by heat
• Precise hemming without measurements

Technical Data

Specification:

Width	70cm
Length	25m / roll
Packing	4rolls / ctn
Gram	90g/m2
Material	100% Polyurethane
Colour	White

Properties:

Instructions

1. Place the film on the reverse side of the fabric (protective paper facing up).
2. Cover with a damp cloth and press down in one place for around 12-15 seconds. Allow to cool for a while.
3. Remove the protective paper, position the second layer, or fold the fabric (for a hem or border) and again press repeatedly with the iron for 12 to 15 seconds. Lift iron and repeat, section by section until all are fused in place.
4. After fixing, lay the pieces down flat to cool down for around 30 minutes to allow the bond to stabilise. Test bond and repeat if necessary.

N.B. Always test the product on a scrap of your project's fabric following steps 2-4 above. Always use a pressing cloth to protect the fabric.

Wash & Care Instructions

12-15 seconds
